Amargosa Valley Town Boundary

SOURCES:
Potential Contaminant Sources are from Wellhead Protection Plan for Nye County Operated Systems in Amargosa Valley (March, 2006). To identify the potential sources of groundwater contamination in the Town of Amargosa Valley, a comprehensive contaminant source inventory was conducted in 1995. The inventory included all contaminant sources within and near the town. The three public water supply systems operated by Nye County are located at the Senior Center, Elementary School and Amargosa Valley Town Complex.

Amargosa Valley Town boundary and Township, Range, Sections are from the Nye County GIS Repository (2008).
